Mr. Joe Schieffelin, Unit Leader
Hazardous Waste Control Program
Colorado Department of Public Health and Environment
4300 Cherry Creek Drive South
Denver, Colorado 80222-1530

Gentlemen:

The modified Final Proposed Action Memorandum (PAM) for the Removal of
Polychlorinated Biphenyls (PCBs) is enclosed. The modifications to this document were
in response to the comments provided by the U. S. Environmental Protection Agency
(EPA) in the letter dated July 6, 1995.

The comparison study requested by the EPA will be conducted as part of the first PCB
removal action performed under this PAM. The results of this study will be provided to
the EPA and the Colorado Department of Public Health and Environment.

The language in second paragraph of Section 3.0 relating to analysis of confirmation
samples has been modified to read "All of the confirmation samples will be analyzed
using EPA SW-846 Draft Method 4020. In addition, twenty percent of the confirmation
samples will be shipped to an off site laboratory for analysis using EPA SW-846 Method
8080. Samples taken of concrete pads for confirmation and waste disposal purposes will
be destructive samples and will be shipped to an off site laboratory for analysis using
EPA SW-846 Method 8080."

Your acceptance of the changes discussed herein and unconditional approval of the
modified Final PAM will be assumed by the U. S. Department of Energy unless we
receive notification to the contrary within seven (7) days of the receipt of this letter. If
you have any questions, please call Roger Merrick at 966-7252.

Sincerely,

Steven W. Slaten
IAG Project Coordinator
Environmental Restoration
